3 1032A LED Matrix Stamp

6 Document control number: 1032-8010

7 Document date: 2022-12-04

8 Document revision: 1.0.0-draft.1

9 ABSTRACT: This document provides instructions on how to assemble and test a 1032A LED matrix stamp. A
complete bill of materials is included as an annex.

10 Suggestions and corrections should be directed to <http://www.github.com/dslik/protonema/issues>

Part I

189

1032A assembly instructions

190 Section 1

191 Overview

192 This document describes the materials, processes, outcomes and verifications required to successfully assemble
193 and test a 1032A LED matrix stamp, a sub-component of the Protonema electronics prototyping and learning
194 system.

195 A first-time reader should carefully review section 2 - prerequisites, and section 3 - preparation before beginning
196 the assembly process.

197 This document serves both as instructions and as a record of the assembly of the product. When you finish each
198 step in this document, sign your name (or apply your stamp) in the "Signature/Stamp" box on the right to provide a
199 record of completion.

200 When things go wrong, this document provides guidance for common issues that have been encountered in the
201 past. When this document does not provide guidance, please contact your quality management representative,
202 who will help you fill out an exception report. These reports help improve process quality and product quality, and
203 these reports are incorporated into future revisions of this document.

204 Always remember: If you are unable to successfully complete these instructions, that means the processes supporting
205 you (including this document) have failed you. Our processes are built for your success, and by improving our processes, we help everyone succeed.

207 Section 2

208 Prerequisites

209 2.1 Required safety training

- 210** The following safety training units must be completed before assembling this product.
211 By signing (or applying your stamp) on the right, you indicate that you have completed the following training:

Table 2: Safety training

Item #	Description	Signature/Stamp
1	0102-0100 - Safety reporting policies and procedures training Key topics: Understanding policies and procedures around how to identify, contain and report a safety-related issue in the workplace, including damaged or malfunctioning equipment, leaks, spills, and other occupational hazards.	Stamp or sign here
2	0102-0101 - Material safety data sheets training Key topics: Understanding how to read material safety data sheets (MSDS) for materials you will be handling during product assembly, how they can affect your health and the health of the environment, how to safely handle and dispose of them, and what to do if there is a spill or accidental exposure.	Stamp or sign here
3	0102-0102 - Solder handling and disposal policies and procedures training Key topics: Understanding policies and procedures related to handling solder and solder paste, stencil cleaning, and solder disposal.	Stamp or sign here
4	0102-0105 - Electro-static discharge controls policies and procedures training Key topics: Understanding policies and procedures related to protecting equipment and components from electro-static discharge, including clothing, protective equipment, material handling and labelling.	Stamp or sign here

2.2 Required skills training

- ²¹² The following skills training units must be completed before assembling this product.
²¹⁴ By signing (or applying your stamp) on the right, you indicate that you have completed the following training:

Table 3: Skills training

Item #	Description	Signature/Stamp
1	0103-0202 - ANSI/ESD S20.20 Electro-static discharge controls Key topics: Understanding of ESD safety, the ESD control program, equipment and personnel grounding, EPAs, packaging and marking.	Stamp or sign here
2	0103-0203 - General components handling Key topics: Understanding of safe component handling, including reeled components, components in JEDEC trays, and loose components. Includes avoiding contamination, moisture control, and component inventory management.	Stamp or sign here
3	0103-0414 - 5040-XTS reflow station Key topics: Safe and effective use of the 5040-XTS reflow station, including use of the pre-heater, the hot air system, and the soldering iron. Covers inspection and verification, cleaning, preferred settings and best practice techniques.	Stamp or sign here
4	0103-0301 - IPC-A-610G - Acceptability of electronic assemblies Key topics: Covers visual acceptability requirements for electronic assemblies, including handling considerations, hardware installation, component placement, soldering, terminal connections, wiring, marking and cleanliness.	Stamp or sign here
5	0103-0302 - IPC-J-STD-001F - Soldered electrical connections Key topics: Covers soldering materials, general soldering and assembly requirements, wire and terminal connections, through-hole mounting, surface mounting of components, cleaning process requirements, PCB requirements, coatings and product assurance.	Stamp or sign here

215 Section 3

216 Preparation

217 3.1 Workspace

- 218 Before starting assembly, check out an assembly desk for a minimum of one hour. Units are assembled in batches
 219 of four, with each batch taking 20 minutes.

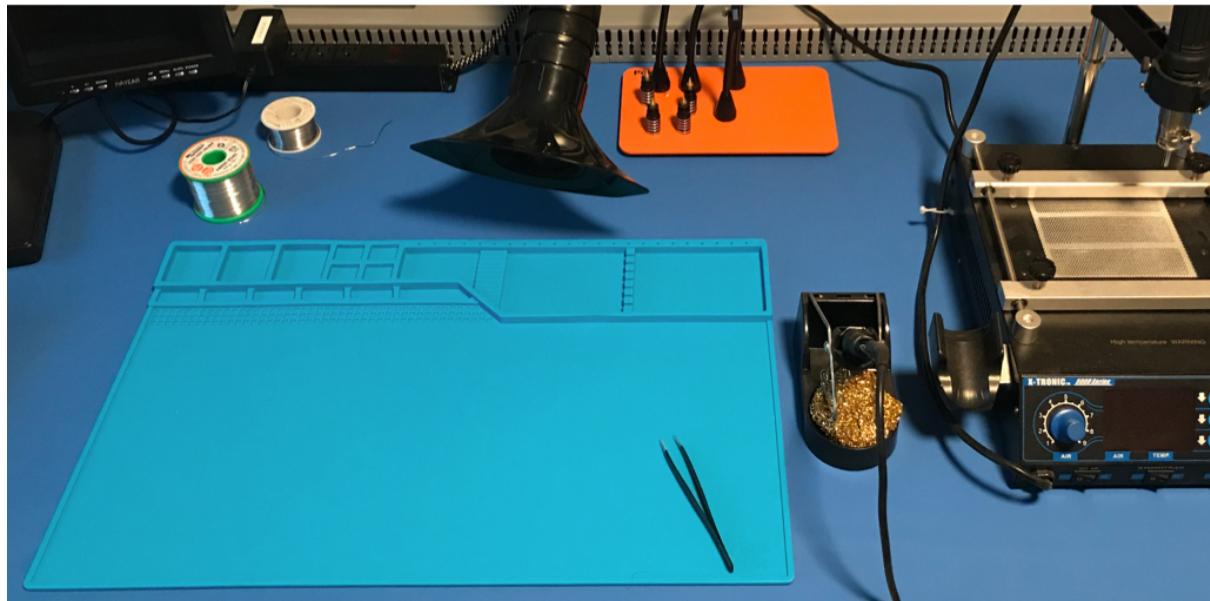

Fig. 1: Assembly Desk

Table 4: Prepare workspace

Step	Description	Signature/Stamp
3.1.1	Verify that the workspace has a clean assembly mat and anti-static mat, and that the cleaning record has been signed since last use.	Stamp or sign here
3.1.2	Verify that the HEPA fume extractor turns on, and you can feel air suction from the nozzle.	Stamp or sign here

continues on next page

Table 4 – continued from previous page

Step	Description	Signature/Stamp
3.1.3	Verify that the 5040-XTS rework station soldering iron tip is not worn down. If it is worn down, obtain a new 900M-T-I tip from the stores department.	Stamp or sign here
3.1.4	Verify that the heating surface of the MHP30 hot plate is clean.	Stamp or sign here

220 3.2 Project consumables

221 Obtain each of the below consumable items from the stores department:

Table 5: Assembly consumables

Item #	Description	Signature/Stamp
3.2.1	 <p>Fig. 2: 1 pair ESD gloves If you prefer to use your own pair of ESD gloves, make sure they are tested before use.</p>	Stamp or sign here
3.2.2	 <p>Fig. 3: 1 spool MG Chemicals 4900 Lead Free No-Clean Wire Solder Sn96.2Ag2.8Cu0.4 (96.2/2.8/0.4) 20 AWG</p>	Stamp or sign here

222 3.3 Project tools

- 223 Obtain a tools container labelled “1XXX Assembly Tools” from the 1XXX section of the stores supply shelf. At your assembly desk, use [Table 6](#) to verify that all the required tools are present.
- 224 If any required tools are missing, return all tools and the tools container to the stores department, and obtain another tools container.

Fig. 4: Tools Container

- 227 Remove each of the following tools from the tools container, and place them on the anti-static mat of the assembly desk:

Table 6: Assembly tools

Item #	Description	Signature/Stamp
3.3.1		Stamp or sign here

Fig. 5: Hozan F-23 components tray

continues on next page

Table 6 – continued from previous page

Item #	Description	Signature/Stamp
3.3.2	 Fig. 6: ESD tweezers	 Stamp or sign here
3.3.3	 Fig. 7: 3mm Phillips adjustable torque screwdriver	 Stamp or sign here
3.3.4	 Fig. 8: Fine-tipped Sharpie marker	 Stamp or sign here

continues on next page

Table 6 – continued from previous page

Item #	Description	Signature/Stamp
3.3.5	 Fig. 9: Scissors	Stamp or sign here

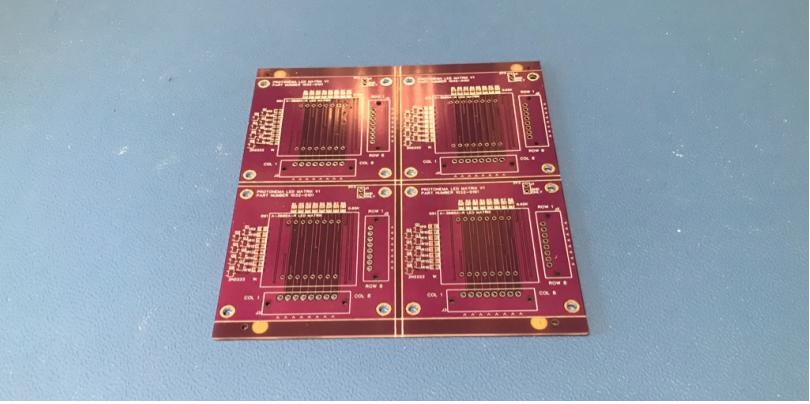

229 **3.4 Parts preparation**

230 **3.4.1 PCBs and PCBAs**

231 NOTICE: All PCBs and PCBAs must be handled with gloves to prevent marking with skin oils.

232 NOTICE: PCBs are removed from manufacturer packaging only when needed.

Table 7: PCBs and PCBAs

Item #	Description	Signature/Stamp
3.4.1.1	No marking required  Fig. 10: 1x 1032-0101 v1.0 - LED Matrix Stamp PCB	Stamp or sign here

233 3.4.2 Reel cuttings

- 234 All reels are stored in the bin labelled "1XXX Reels" on the shelf labelled "1XXX Components". As this is a manually
 235 assembled product (no automated pick-and-place), tape should be cut off as needed for the number of units being
 236 assembled, and placed in the assembly tray.

Fig. 11: Reels Container

- 237 Cut off the indicated number of parts (multiplied by the number of units to be assembled), and mark them with the
 238 value:

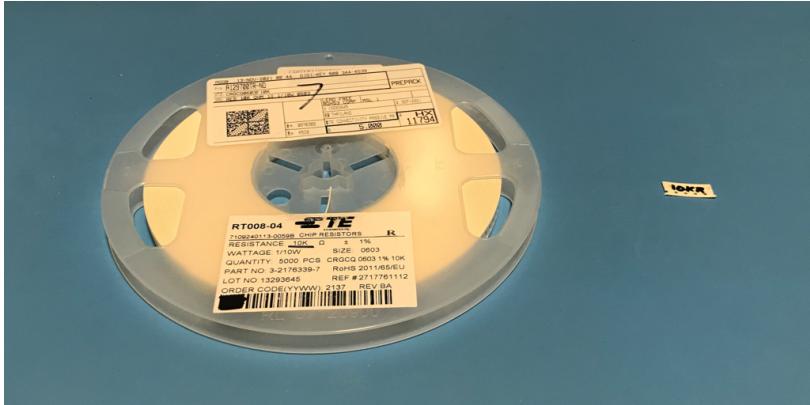

Table 8: Assembly reels

Reel #	Description	Signature/Stamp
1	<p>Mark with "649R"</p>	<p>Stamp or sign here</p>

Fig. 12: 8x 649 Ohm 0603 resistors

Table 8 – continued from previous page

Reel #	Description	Signature/Stamp
7	Mark with "10KR" 	Stamp or sign here
17	No marking required 	Stamp or sign here

²³⁹ Be sure to return the 1XXX Reels bin as soon as you have finished cutting off the required parts.

240 3.4.3 Loose components

241 All loose components are stored on the shelf labelled “1XXX Components”. Take the components tray and obtain
 242 the following quantities of the following parts:

Table 9: Loose components

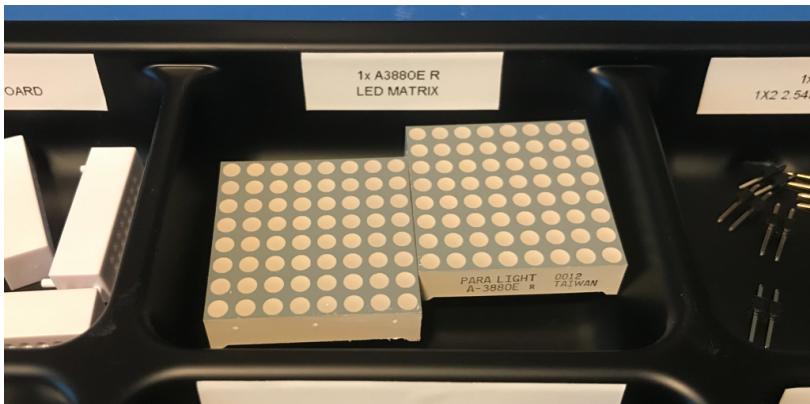

Item #	Description	Signature/Stamp
3.4.3.1	No marking required 	Stamp or sign here
3.4.3.2	No marking required 	Stamp or sign here
3.4.3.3	No marking required 	Stamp or sign here

3.4.4.5	<p>No marking required</p> 	<div style="text-align: center; border: 1px solid gray; border-radius: 50%; width: 100px; height: 100px; margin: auto;"> Stamp or sign here </div>
3.4.4.6	<p>No marking required</p> 	<div style="text-align: center; border: 1px solid gray; border-radius: 50%; width: 100px; height: 100px; margin: auto;"> Stamp or sign here </div>

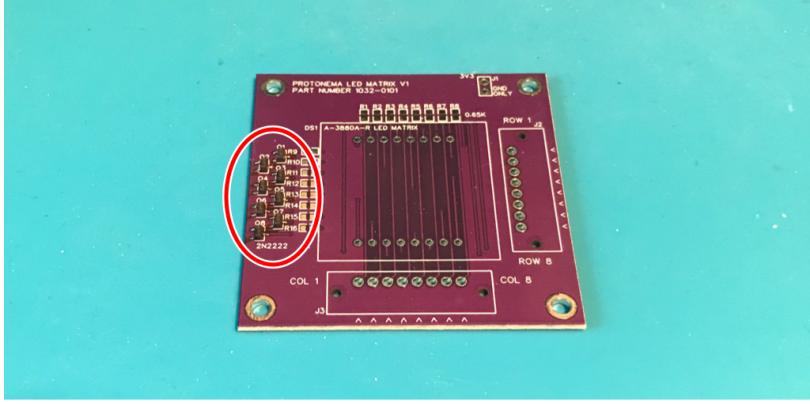

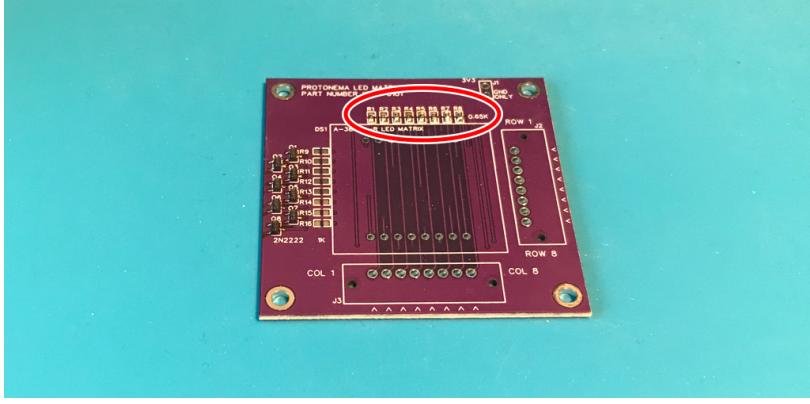

246 Section 4

247 Assembly

248 4.1 1032A assembly

249 This assembly step takes 5 minutes.

Table 11: 1032A assembly steps

Step #	Description	Signature/Stamp
4.1	Solder Q1 through Q8 onto the 1032-0101 PCB. 	Stamp or sign here
4.2	Solder R1 through R8 onto the 1032-0101 PCB. 	Stamp or sign here

continues on next page

Table 11 – continued from previous page

Step #	Description	Signature/Stamp
4.3	Solder R9 through R16 onto the 1032-0101 PCB.	Stamp or sign here
4.4	Insert the 2 pin header into J1 from the rear of the board, flip the board, and solder one pin of the header on, flip the board again and sure it is 90 degrees to the board, then solder the remaining pin.	Stamp or sign here
4.5	Insert the A3880E display module with the part number label facing down. Flip the board, and solder the display connectors, making sure that the display module pins are consistently at the top of the through holes.	Stamp or sign here

Fig. 29: 1032-0101 PCB with R9-R16 soldered on.

continues on next page

Table 11 – continued from previous page

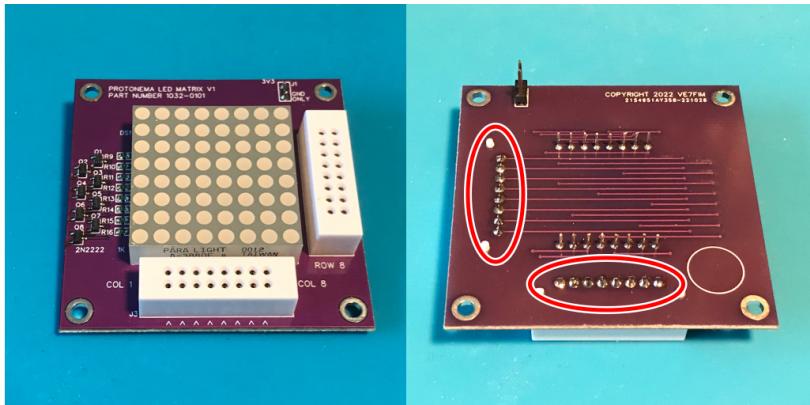

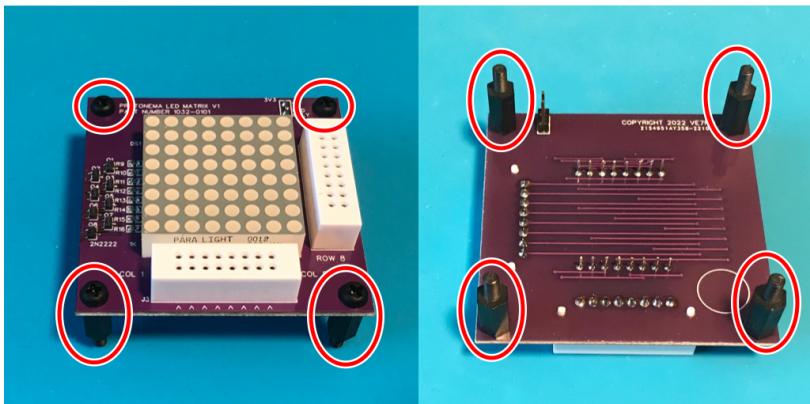

Step #	Description	Signature/Stamp
4.6	Insert the two breadboard modules, then solder.	
4.7	<p>For each of the four corner holes, attach a nylon screw to a nylon post through the hole.</p>  	

Fig. 32: 1032-0101 PCB with the two breadboard modules soldered on.

Fig. 33: 1032-0101 PCB with four nylon posts attached.

250 **Section 5**

251 **Test**

252 **5.1 Visual inspection**

253 This test process takes 2 minutes.

Table 12: 1032A visual inspection

Step #	Description	Signature/Stamp
1	Verify that there are no loose parts.	Stamp or sign here
2	Verify that there are no visible fingerprints.	Stamp or sign here

254 5.2 QC final check

255 This test process takes 2 minutes.

Table 13: 1032A QC final check

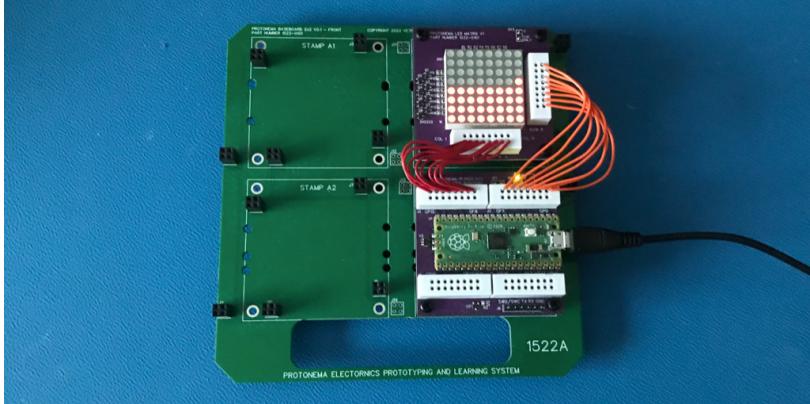

Step #	Description	Signature/Stamp
1	<p>Connect the 1032A to a baseboard and to a pre-programmed 1031A, as shown below. Connect power and verify that all of the LEDs light up in sequence.</p> <p>If test does not pass, write down the unexpected behaviour in the "Signature/Stamp" column on the right.</p> 	Stamp or sign here

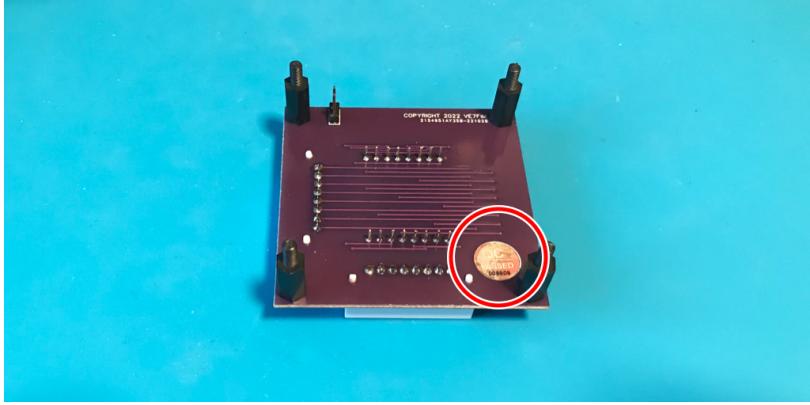

Fig. 34: Powered 1032-0101 PCB driven by a 1031A.

256 5.3 QC PASS

257 Only perform these steps if all QC checks have passed.

258 This test process takes 1 minutes.

Table 14: 1032A QC approval

Step #	Description	Signature/Stamp
1	<p>Using the tweezers, affix QC Passed sticker in location shown below, then write down the serial number from the QC sticker below the "Signature/Stamp" in the column to the right.</p> 	<div style="text-align: center;">Stamp or sign here</div>
2	<p>Take two photographs, one of the front of the 1032A, and one of the back of the 1032A.</p>	<div style="text-align: center;">Stamp or sign here</div>

259 5.4 QC FAIL

- 260 Only perform these steps if any QC check have failed.
 261 This test process takes 2 minutes.

Table 15: 1032A QC fail

Step #	Description	Signature/Stamp
1	Place the 1032A module in the anti-static bag. 	Stamp or sign here
2	Take an A4 plastic bag, and place the 1032A, along with this document, in the "QC Fail" bin 	Stamp or sign here

Fig. 36: 1032A in anti-static bag.

Stamp or sign here

Stamp or sign here

Table 16 – continued from previous page

Step #	Description	Signature/Stamp
6.1.7	Using the ESD tape, secure the lid of the box. 	Stamp or sign here
6.1.8	Affix a 1032A sticker to the lid of the box. 	Stamp or sign here
6.1.9	Using the Sharpie pen, Write down the serial number of the 1032A on the sticker, at the end of the line listing the 1032A. 	Stamp or sign here
6.1.10	Take a photograph of the sealed 1032A box.	Stamp or sign here

Section 7

Clean-up

7.1 Consumables

This packaging process takes 5 minutes.

Table 17: Consumables cleanup

Step #	Description	Signature/Stamp
1	If the ESD gloves have contacted solder paste, or are soiled, they shall be disposed of in the standard waste bin.	Stamp or sign here
2	If there is unused solder wire on the spool, it shall be returned to stores.	Stamp or sign here
3	Loose component packaging shall be disposed of in the standard waste bin.	Stamp or sign here

7.2 Tools

This cleanup process takes 5 minutes.

Table 18: Tools cleanup

Step #	Description	Signature/Stamp
1	All tools shall be returned to the assembly tools container, and returned to the stores supply shelf. If any tools are damaged or worn, return the container to stores, and let the manager know which tool is damaged or worn.	Stamp or sign here

continues on next page

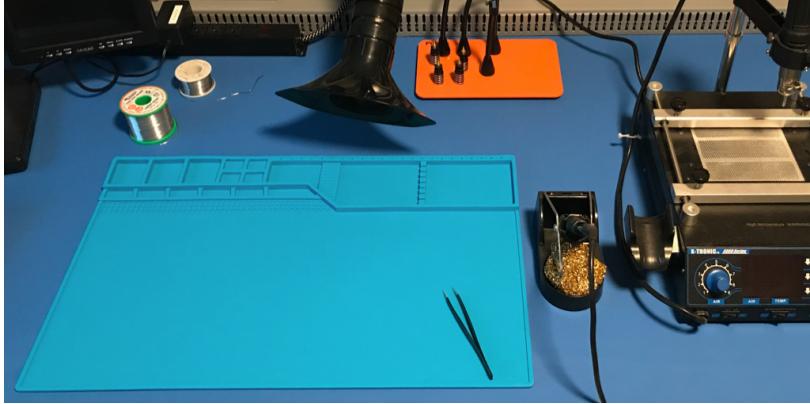

Table 18 – continued from previous page

Step #	Description	Signature/Stamp
2	Remove this document from the springback binder.	
3	Print a new copy of this document, and insert it into the springback binder that this document was originally in.	
4	Return the springback binder with the newly printed document to the 1032A section of the store supply shelf.	

272 7.3 Workspace

273 This packaging process takes 5 minutes.

Table 19: Workspace cleanup

Step #	Description	Signature/Stamp
1	<p>Make sure that the workspace is clean and as it was when you started the assembly.</p>  <p>Fig. 46: Clean assembly workstation</p>	Stamp or sign here

Section 8

Record keeping

8.1 1032A record keeping

This packaging process takes 5 minutes.

Table 20: 1032A record keeping

Step #	Description	Signature/Stamp
1	<p>Write the serial number, the date, and your first and last name in large print on the bottom of the front cover of this document.</p> <div style="text-align: center; margin-top: 10px;">  FPO </div>	<div style="text-align: center; margin-top: 10px;">  Stamp or sign here </div>
2	Create a new folder under the 1032A folder, named with the serial number.	<div style="text-align: center; margin-top: 10px;">  Stamp or sign here </div>
3	Copy all photos taken during the assembly process into the newly created folder in step #2.	<div style="text-align: center; margin-top: 10px;">  Stamp or sign here </div>
4	Remove this document from the binding clamps, scan the document, and save the scanned PDF into the newly created folder in step #2, with the name "1032A-SNAAAAAA.pdf", where AAAAAA is replaced with the serial number.	<div style="text-align: center; margin-top: 10px;">  Stamp or sign here </div>

continues on next page

Table 20 – continued from previous page

Step #	Description	Signature/Stamp
5	Three-hole punch the document, then file it at the end of the current month's assembly records binder.	 Stamp or sign here
6	Add an entry to the assembly records binder, "<Date> - 1032A - SN# AAAAAAA - <Your Name>", where <Date> is replaced with today's date in ISO-8601 YYYY-MM-DD, where AAAAAAA is replaced with the serial number of the 1032A, and where <Your Name> is replaced with your first and last name.	 Stamp or sign here

06/29/2022

Molex is committed to managing the use of chemical substances in accordance with governmental regulations, industry standards, and customer-specific requirements in order to protect the environment. For each part listed, this document provides:

- EU RoHS Compliance Status.** EU RoHS status is declared per Directive 2011/65/EU and its subsequent amendments, including the Directive EU 2015/863 which additionally prohibited four phthalates. Homogeneous materials of parts that are compliant to this legislation have less than 0.1% by weight each of lead, mercury, hexavalent chromium, PBB, PBDE, DBP, BBP, DIBP, DEHP, and 0.01% by weight of cadmium. In situations where an exemption applies, the preceding limits, corresponding to the exempted substance(s), may be higher.

Molex's sole liability for incorrectly certifying a product shall be either replacement of the Molex product or, alternatively and in the sole discretion of Molex, return of the purchase price paid for the relevant Molex product.

For additional information regarding Molex's environmental initiatives and further explanation of this information, please visit www.molex.com

313 12.8 Nexperia MMBT2222A

Table 31: Nexperia MMBT2222A RoHS Compliance

Declaration for Nexperia MMBT2222A - <https://www.nexperia.com/dam/jcr:96c06925-615d-4095-b779-3718c9f9cdde/Nexperia%20-%20Statement%20on%20RoHS.pdf>

July 2022

CERTIFICATE OF COMPLIANCE - RoHS Declaration -

Nexperia B.V. declares that its semiconductor products (including homogeneous sub-components, pins, casing, and internal parts) are designed to be:

RoHS compliant by meeting the requirements defined under Directive 2011/65/EU of 2011-07-21, amended by Directive (EU) 2015/863 of 2015-03-31, on the restriction of the use of certain hazardous substances in electrical and electronic equipment (EEE):

RoHS Restricted Substance	Allowable Limit
Cadmium (Cd)	100 ppm (0.01 weight %)
Mercury (Hg)	1000 ppm (0.1 weight %)
Hexavalent chromium (Cr ⁶⁺)	1000 ppm (0.1 weight %)
Lead (Pb)	1000 ppm (0.1 weight %)
Polybrominated biphenyls (PBBs)	1000 ppm (0.1 weight %)
Polybrominated diphenyl ethers (PBDEs)*	1000 ppm (0.1 weight %)
Bis(2-ethylhexyl) phthalate (DEHP)	1000 ppm (0.1 weight %)
Butyl benzyl phthalate (BBP)	1000 ppm (0.1 weight %)
Dibutyl phthalate (DBP)	1000 ppm (0.1 weight %)
Diisobutyl phthalate (DIBP)	1000 ppm (0.1 weight %)

* Including decabromodiphenylether (decaBDE).

All Nexperia devices are RoHS compliant. Nexperia devices contain no more than 0.1 % lead (Pb) by weight per homogeneous material or may contain lead (Pb) in applications allowed by the RoHS Directive. Nexperia may apply any of the following RoHS exemptions to RoHS compliant Nexperia devices:

RoHS Exemption	RoHS Exemption Description
7(a)	Lead in high melting temperature type solders (i.e. lead-based alloys containing 85% by weight or more lead)
7(c)-I	Electrical and electronic components containing lead in a glass or ceramic other than dielectric ceramic in capacitors, e.g. piezoelectric devices, or in a glass or ceramic matrix compound

Nexperia devices can be recognized by the "RoHS compliant" logo on the box label. In addition, products that do not make use of any exemption on the use of lead can be recognized by the "Lead-free" logo.

To facilitate customer requirements and to verify Nexperia product compliance, Nexperia material content information is available here:
<https://www.nexperia.com/quality/download-multiple-product-compositions.html>
